

Building blocks containing isocyanate groups and their use for functionalizing or modifying compounds or surfaces

5 Abstract

Compounds of the formula 1

10 $\text{OCN-R}^1\text{-NHCOX-R}^2\text{-(Y)}_n$ (1),

where X is a covalent bond to R² or is O, S or NR³, Y is a hydrogen atom or a free functional group and n is an integer from 1 to 20, can be used for functionalizing or modifying compounds
15 or solid surfaces which have at least one group which is reactive toward isocyanate.
